METEORITICS

Journal of the Meteoritical Society

VOLUME 18, 1983

CONTENTS

VOLUME 18

NUMBER 1 — MARCH 1983

D.W.G. Sears and M. Ross:
Classification of the Allan Hills A77307 Meteorite 1
Peter H. Stauffer: Phantom Tektite Localities of Borneo 9
Darryl S. Futrell and Kurt Fredriksson:
Brecciated Muong Nong-Type Tektites 15
A.J. Easton: Grain-Size Distribution and
Morphology of Metal in E-Chondrites 19
J.R. DeLaeter and W.H. Cleverly:
Further Finds from the Mundrabilla Meteorite Shower 29
Steven B. Simon and J.J. Papike: Petrology of Igneous Lithic Clasts
from Polymict Eucrites ALHA 76005 and ALHA 77302 35
A.L. Graham: An Unequilibrated Inclusion in the
Romero (H3-4) Chondrite 51
Paul S. Sipiera, Edward J. Olsen, Dorothy L. Eatough, and Bruce D. Dod:
Summary of Several Recent Chondrite Finds
from the Texas Panhandle 63
The Meteoritical Bulletin 77
Miscellanea 85

NUMBER 2 — JUNE 1983

Masako Shima, Sadao Murayama, Akihiko Okada, Hideo Yabuki, and
Nobuo Takaoka: Description, Chemical Composition
and Noble Gases of the Chondrite Nogata 87
Jeremy S. Delaney, H. Takeda, M. Prinz, C.E. Nehru, and
G.E. Harlow: The Nomenclature of Polymict Basaltic Achondrites 103
Alan E. Rubin: The Atlanta Enstatite Chondrite Breccia 113
S.V.S. Murty, P.N. Shukla, and P.S. Goel:
Lithium in Stone Meteorites and Stony Irons 123
P.K. Swart, M.M. Grady, and C.T. Pillinger:
A Method for the Identification and Elimination of Contamination
During Carbon Isotopic Analyses of Extraterrestrial Samples 137
L. Levsky: Terrestrial Fission Xenon:
Choice of Primordial Isotopic Composition 155
William Graves Hoyt: Meteor Crater:
Historical Note on Nomenclature 159
G.R. Levi-Donati and Roy S. Clarke, Jr.:
Brianza: An Example of Wrongly Belived Chondrite 165
Miscellanea 167
Errata 169

NUMBER 3 — SEPTEMBER 1983

C.E. McEwing, C.E. Rees, and H.G. Thode:
Sulphur Isotope Ratios in the Canyon Diablo Metallic Spheroids 171

Alan E. Rubin, Angeline Rehfeldt, Eric Peterson, Klaus Keil, and
Eugene Jarosewich: Fragmental Breccias and the Collisional Evolution
of Ordinary Chondrite Parent Bodies 179
G. Paolo Sighinolfi and Carlo Gorgoni: Lithophile Elements
in Individual Chondrules of the H-4 Mafra Chondrite 197
O.K. Manuel and Golden Hwaung: Solar Abundances of the Elements 209
M. Bukovanská, P. Jakeš, E. Pernicka, and A. El Goresy:
Ustí nad Orlici: A New L6 Chondrite from Czechoslovakia 223
W.F. Read: Shatter Cones at Glover Bluff, Wisconsin 241
Brian Mason: The Definition of a Howardite 245
Jeremy S. Delaney, M. Prinz, and H. Takeda:
Reply to B. Mason: 'Definition of a Howardite' 247
The Barringer Award 249
Miscellanea 251

NUMBER 4 — DECEMBER 1983

Citation of the Award of the Leonard Medal of the Meteoritical Society 255
Acceptance of the Leonard Medal of the Meteoritical Society, 1983 257

Abstracts

A.A. Almohandis and R.S. Clarke, Jr.:
The Alkhamāsin, Saudi Arabia, Iron Meteorite 260
J.O. Annexstad, L. Schultz, and S. Epstein:
The Allan Hills Meteorite Icefield — An Alternate View 260
S.I. Araujo, J. Danon, R.B. Scorzelli, I.S. Azevedo, and E. Galvao da Silva:
Mössbauer Study of Silicates and Metal Phases of the Bocaiuva Meteorite 261
John W. Arden: Distribution of Thallium and Lead
in the Allende C3(V) Carbonaceous Chondrite 261
J.R. Ashworth and F.A. Levi: Etching Study of Olivine in Kernouvé
Chondrite Treated by Low-Temperature Thermal Cycling 262
G.V. Baryshnikova, S.A. Stakheeva, K.I. Ignatenko, and A.K. Lavrukhina:
The Doroninsk Meteorite — A Monomict H5-7 Chondrite Breccia 263
A. Basu and D.S. McKay: Rarity of Lunar Soil Analogs in Meteorites 263
R.H. Becker and R.O. Pepin: Nitrogen Isotopic
Composition in EETA 79001 264
H. Beer, G. Walter, R.L. Macklin, and P.J. Patchett:
On the Astrophysical Impact of ^{176}Lu, a Long Lived
Radioactive Relic of Stellar s-Process Nucleosynthesis 265
K.J. Benusa and J.I. Goldstein: Simulation of Meteoritic
Tetrataenite by Electron Irradiation of FeNi Alloys 265
Rawi Bhavilai: The Chiang Kahn Meteorite 266
R.W. Bild, K.L. Robinson, E.R.D. Scott, and M. Prinz:
Origins of Mesosiderites as Inferred from Instrumental Neutron
Activation Analysis of Their Metallic Fe, Ni 266
J.L. Birck and C.J. Allegre: Systematics of
Spallation Products in Iron Meteorites 267
A. Bischoff, K. Keil, and D. Stöffler:
Abundant Al-Rich Objects in Ordinary Chondrites 268
M. Blander, M.-L. Saboungi, C. Wai, and S. Herron:
Condensation of Refractory Oxides: Another Look 269
D.D. Bogard, L.E. Nyquist, P. Johnson, J. Wooden, and B. Bansal:
Chronology of Brachina 269
W.V. Boynton, D.H. Hill, D.A. Wark, and A. Bischoff:
Trace Elements in Ca, Al-Rich Chondrules in the
Dhajala (H3) Chondrite 270

J.P. Bradley, D.E. Brownlee, and P. Fraundorf:
Heterogeneous Catalysis — Its Role in the Formation
of Carbon in Interplanetary Dust 271
Franz Brandstätter and Gero Kurat:
All-Jim: A Large Ca-Al-Rich Chondrule from Allende (C3) 272
V.F. Buchwald: On the Corrosion and Preservation of Iron 272
V.F. Buchwald, W.A. Cassidy, T.K. Meunier, and Carl Thompson:
Antarctic Blue Ice Fields and the Search for Meteorites
Near the Allan Hills 273
M. Bukovanská: Žebrák (Praskolesy),
A H5 Chondrite from Czechoslovakia 274
P.J. Burek, H. Wänke, and J.D. Arneth:
K/T-Environmental Changes: Lattengebirge/SE-Germany 275
P.S. Butterworth and A.J. Meadows:
Ultraviolet Reflectance Properties of Asteroids 276
Leslie P. Carr, M.M. Grady, I.P. Wright, C.T. Pillinger, and A.E. Fallick:
Carbon, Nitrogen and Hydrogen in Enstatite Chondrites 276
Robert H. Carr, I.P. Wright, C.T. Pillinger, R.S. Lewis, and E. Anders:
Interstellar Carbon in Meteorites: Isotopic Analysis
Using Static Mass Spectrometry 277
Z. Ceplecha: Relations Connecting Meteoroids with Meteorites 278
Clark R. Chapman: From Asteroids to Meteorites:
Role of Asteroid Collisions 278
J.H. Chen and G.J. Wasserburg:
A Search for Primordial Pb in Iron Meteorites 279
A. Christiansen, L. Larsen, H. Roy-Poulsen, N.O. Roy-Poulsen,
L. Vistisen, and J.M. Knudsen: The Distribution of Fe-Ni Phases
in Different Layers of a Taenite Lamella from the Iron Meteorite
Cape York — Studied by Combining Conversion Electron
Mössbauer Spectroscopy and Etching 281
Donald D. Clayton: *s*-Process Nd in Allende Residue 281
Robert N. Clayton, Toshiko K. Mayeda, Carol A. Molini-Velsko,
and J.N. Goswami: Oxygen and Silicon Isotopic Composition
of Dhajala Chondrules 282
J. Crabb: Noble Gases in Silicate Inclusions
from the El Taco (IA) Iron Meteorite 283
Richard Crane, Urs Krähenbühl, Louis A. Rancitelli, and John Schutt:
Thiel Mountains, A New Area for Meteorite Collection in Antarctica 284
Ghislaine Crozaz and Douglas R. Tasker: Fission and Spallation Tracks
in Merrillite: Their Annealing Behavior and the Recent
Thermal History of Meteorites 284
W.S. Curvello, D.J. Malvin, and J.T. Wasson:
Bocaiuva: A Unique Silicate-Inclusion-Bearing Iron Meteorite 285
J. Czajkowski, P. Englert, A. Bosellini, and J.G. Ogg:
Cobalt Enriched Hardgrounds — New Sources
of Ancient Extraterrestrial Materials 286
J. Czajkowski and P.A. Farnsworth: Sectioning of Cosmic Spherules 287
M. de Angelis, L. Fehrenbach, M. Maurette, C. Hammer, and A. Gaudichet:
Analytical Microscopy of Dust Grains from Polar Ices and Snows 288
Jeremy S. Delaney: The Formation of Mesosiderites, Pallasites
and Other Metal-Silicate Assemblages: Two Mechanisms 289
C. Desnoyers and M. Christophe Michel-Lévy:
The Olivine in the Lunar Meteorite ALHA 81005 290
Michael J. Drake and John H. Jones:
Partitioning of Re Between Metal and Silicate Phases 291
G. Dreibus and H. Wänke: Halogens in Antarctic Meteorites 291

A.J. Easton: Elemental Distribution in E-Chondrites: Partition of Elements Between Silicate and Sulphide Groups of Minerals 292
M. Ebihara, R. Wolf, G.R. Richter, and E. Anders: Aubrites and Diogenites: Trace Element Clues to Their Origin 293
A. El Goresy, H. Yabuki, and E. Pernicka: Qinzhen: A Tentative Alphabet for the Enstatite Chondrite Clan 293
P. Englert, R.C. Reedy, R. Fox, and J.R. Arnold: Thick Target Irradiations As Simultations of Cosmic Ray Bombardments 294
O. Eugster, N. Grögler, and J. Geiss: Mineral Separates of Gray Soil 74261: Uniform Pre-Exposure and Uniform Trapped Gas Composition? 295
Bruce Fegley: The Stability of Refractory Noble Metal-Lithophile Alloys in Enstatite Chondrites and Aubrites 296
A.V. Fisenko, D. Vu. Minh, L.F. Semjonova, A.K. Lavrukhina, and Yu.A. Shukolyukov: On Origin of the Xe Isotopic Anomalies in the Kainsaz CO Carbonaceous Chondrite 298
K. Fredriksson and S. Specht: Ion Probe Analysis of Chondrite Samples 298
M. Freundel, J. Crabb, and L. Schultz: ^{81}Kr Terrestrial Ages of Antarctic Eucrites 299
M. Freundel, R.C. Reedy, and L. Schultz: The Production Rate of Cosmogenic ^{38}Ar in Eucrites 300
Naoyuki Fujii, Yoshitsugu Furukawa, Keisuke Ito, and Masamichi Miyamoto: Shape Analysis for Complex Boundary Grains by the Fourier Descriptor 300
Michael J. Gaffey: The "S" Asteroids and the Ordinary Chondrites: The (8) Flora Case 301
I. Gilmour, P.K. Swart, and C.T. Pillinger: The Carbon Isotopic Composition of Individual High Molecular Weight Alkanes in the Murchison Carbonaceous Chondrite 302
C. Göpel, G. Manhes, and C.J. Allègre: Lead in Iron Meteorites: Evidence for Terrestrial Contamination and Isotopic Uniformity of Primordial Lead 303
J.N. Goswami, R. Jha, and D. Lal: A Quantitative Analytical Treatment for Annealing of Charged Particle Tracks in Minerals 304
M.M. Grady, I.P. Wright, C.T. Pillinger, and P.K. Swart: Ureilite Achondrites: A Stable Isotope Study 304
A.L. Graham and P. Henderson: Rare Earth Element Distribution in the Mayo Belwa Aubrite 305
F. Grass, C. Koeberl, and G. Wiesinger: Mössbauer Spectroscopy as a Tool for the Determination of Fe^{3+}/Fe^{2+}-Ratios in Impact Glasses 305
S.F. Green, N. Eaton, R.S. McCheyne, and A.J. Meadows: Spectrophotometry of Asteroids in the Infrared 306
Jeffrey N. Grossman: The Causes of Variability Among Chondrule Compositions 307
S. Gupta, R. Shipp, J. Lawless, T. Wydeven, and S. Chang: Organic Matter in the Primitive Solar System: Plasma Initiated Synthesis 307
J. Halbout, F. Robert, and M. Javoy: Oxygen Isotopes in Unequilibrated Chondrites 308
Ryoichi Hayatsu, Robert G. Scott, and Randall E. Winans: Comparative Structural Study of Meteoritic Polymer with Terrestrial Geopolymers Coal and Kerogen 310
John E. Heidenreich III and Mark H. Thiemens: A Non-Mass-Dependent Isotope Effect in the Electrodissociation of CO_2 310
I. Herrwerth, N. Müller, E.K. Jessberger, and T. Kirsten: ^{40}Ar-^{39}Ar Dating of Individual Chondrules and the Siting of Trapped Argon 311

Jan Hertogen, Marie-Josée Janssens, H. Takahashi, and John W. Morgan:
Enstatite Chondrites: Trace Element Clues to Their Origin 311
G. Heusser, T. Kirsten, and Z. Ouyang:
Drill Core Probing of the Jilin Chondrite 312
Roger H. Hewins and G.C. Ulmer: Diogenites and Mesosiderites:
Intrinsic Oxygen Fugacities and Parent Bodies 312
C.M. Hohenberg, M.W. Caffee, T.D. Swindle, G.D. Hudson, and
G.W. Wasserburg: I-Xe Studies of Allende Inclusions 313
M. Honda, T.J. Bernatowicz, and F.A. Podosek: Noble Gas Chronology
of Two Antarctic Enstatite Meteorites 314
M. Honda, H. Nagai, M. Imamura, K. Nishiizumi, K. Yoshida,
I. Yamane, H. Yamashita: Cosmogenic ^{10}Be in Meteoritic Irons and Stones 315
P. Horn, J. Pohl, and E. Pernicka: Siderophile Elements in the
Graded Fall-Back Unit from Ries Crater, Germany 317
R.M. Housely, R.S. Rajan, E.R. Rambaldi, and D. Wang:
Evidence for Oxidized Components in Qingzhen Enstatite Chondrite 317
Mohanna Huth and F. Begemann: Investigations of Matrix
and an Inclusion of the Belle Plaine Meteorite 318
E. Jagoutz, B. Spettel, H. Wänke, and B. Dawson:
Identification of Early Differentiation Processes on the Earth 319
M. Javoy and F. Pineau: Stable Isotope Constraints on a
Model Earth from a Study of Mantle Nitrogen 320
E.K. Jessberger: Ar-Ar Ages of Carbonaceous and Enstatite Chondrites 321
J.H. Jones: *Noch Einmal*, the Composition of the
Eucrite Parent Body and the Origin of Eucrites 321
Gregory W. Kallemeyn and John F. Kerridge:
Kaidun: A New Chondrite Related to the CI Group? 322
J.F. Kerridge and S. Chang: Isotopic Characterisation
of Carbonaceous Matter in Murchison 323
I.L. Khodakovsky, V.A. Dorofecva, and A.B. Makalkin:
Physico-Chemical Model of Evolution of Protoplanetary Nebula 323
Elbert A. King: Vapor Fractionation Trends of Major Elements
for Meteorite and Rock Samples Under Vacuum 324
T.V.V. King, L.A. McFadden, M.J. Gaffey, and T.B. McCord:
Mineralogical Classification and Interpretation of Asteroid
Spectra in the 0.3-0.9 μm Range 324
T. Kirsten, J. Oehm, H. Richter, and A. Rocholl:
Rare Gas Isotopes from the Upper Mantle in Hawaiian Peridotites 325
C. Koeberl and F. Grass: Rapid Instrumental Neutron Activation Analysis
(RINAA): Application for Tektite and Impactite Analysis 325
C. Koeberl and W. Kiesl: The Usage of Siderophile Elements for
Determining the Class of Tektite Producing Cosmic Primary Bodies 326
Kathleen Kordesh: Fourier Grain Shape Analysis of Clasts
in Achondrites Utilizing Shape Frequency Distributions 327
Alan S. Kornacki: Mineral Chemistry and Origin
of Refractory Nodules in Olivine-Rich Allende Inclusions 328
Alfred Kracher, Edward R.D. Scott, and Klaus Keil:
Relict Grains and the Significance of Collisions
during Chondrule Formation 329
G. Kurat, E. Pernicka, I. Herrwerth, and A. El Goresy:
Prechondritic Fractionation of Chainpur Constituents:
Evidence for Strongly Reducing Conditions in the Early Solar System 330
I. Kushiro and H. Nagahara: A Possible Process
for Chemical Fractionation of Chondrites 331
Frank T. Kyte and John T. Wasson: On the Nature of the
Materals Accreted at the End of the Cretaceous 332

M.A. Lange, P. Lambert, and T.J. Ahrens: Shock Induced Dehydration as a Mechanism for Supply and Circulation of Water on Carbonaceous Parent Bodies 332
Y. Langevin: Asteroids and Meteorites: What Can We Learn from a Space Mission? 333
John W. Larimer and R. Gamapathy: Trace Element Content of Oldhamite and Other Minerals Unique to Enstatite Chondrites 334
L. Larsen, M.-L. Andersen, K.L. Rasmussen, H. Roy-Poulsen, L. Vistisen, H. Østergard, J.M. Knudsen, and G.B. Jensen: On the Presence of Highly Ordered and Disordered FeNi (~ 50% Ni) in Taenite Grains from the Ordinary Chondrite Neenach (L6) 334
J.C. Laul, J.J. Papike, and S.B. Simons: Chemical Groups in the Apollo 11 Highland Component 335
B. Lavielle and S. Regnier: About Cosmogenic Krypton in Iron Meteorites 335

A.K. Lavrukhina: On the Meteorites with Multi-Stage Irradiation by Galactic Cosmic Rays 337
Typhoon Lee and Fouad Tera: Searching for Chromium Isotopic Anomalies in Allende Inclusions 337
G.R. Levi-Donati: European Still Undescribed Stones: — A Proposal 339
R.S. Lewis, M.M. Grady, I.P. Wright, C.T. Pillinger, and A.E. Fallick: Isotopic Composition of C and N in Noble Gas Host Phases in C1 Carbonaceous and Type 3 Ordinary Chondrites 340
J.C. Lorin, G. Slodzian, and A. Havette: High Precision Isotope Abundance Determination in Secondary Ion Emission with Electrostatic Peak-Switching: Magnesium in Meteoritic Materials 340
R.D. Loss, K.J.R. Rosman, and J.R. De Laeter: Abundances of Pd, Ag, Cd and Te in Carbonaceous Chondrites 341
G.W. Lugmair, T. Shimamura, R.S. Lewis, and E. Anders: Isotopic Abundance Patterns in Allende Residues — Origin and Implications 342
Gayle Lux: Cosmogenic Neon in Murchison Seperates: Evidence for Different Pre-Aggregation Exposure Histories 342
Ian D.R. Mackinnon and Frans J.M. Rietmeijer: Layer Silicates and a Bismuth Phase in Chondritic Aggregate W7029* A 343
D.J. Malvin, K.L. Rasmussen, and H. Roy-Poulsen: Compositional Studies of Taenite 344
O.K. Manuel and Golden Hwaung: Solar Abundances of the Chemical Elements 345
K. Marti: Cosmic-Ray Exposure Evidence for Multiple Fragmentation of Meteoroids 346
Ursula B. Marvin: The Meteoritical Society: The First 50 Years 347
Takafumi Matsui and Naoji Sugiura: Gas Permeability of Ordinary Chondrite 347
D.P. Mattey, C.T. Pillinger, and A.E. Fallick: Hydrogen Isotopic Composition of Water in Fluid Inclusions in the Peetz L6 Chondrite 348
Toshiko K. Mayeda, Robert N. Clayton, and Donald E. Brownlee: Oxygen Isotopes in Micrometeorites 349
R.S. McCheyne, N. Eaton, S.F. Green, and A.J. Meadows: Asteroid Light Curves and Surface Properties 350
P. McConville: A Laser Probe Study of Aron Isotopes in Lunar Impact Melt Glasses 350
Lucy A. McFadden: S-Type Asteroids and Their Relation to Ordinary Chondrites 352

R.E. McGuire, J.N. Goswami, R. Jha, D. Lal, and R.C. Reedy:
Recent Fluxes of Solar Protons 353
K.D. McKeegan, R.M. Walker, and E. Zinner: Light Element
Distributions Within Individual Interplanetary Dust Particles 354
Harry Y. McSween, Jr.: The Role of Assimilation
in Shergottite Petrogenesis 354
H.J. Melosh: The Physics of Impact Ejecta
Fragmentation and the Origin of Meteorites 355
R. Michel, P. Dragovitsch, and R. Stück: On the Terrestrial
Simulation of the Cosmic Ray Bombardment of Meteorites 356
M. Miyamoto, M. Kinoshita, Y. Takano, and H. Takeda:
Spectral Reflectances for Mixtures of Olivine
and Pyroxene from an Ordinary Chondrite 356
Carol Molini-Velsko, T.K. Mayeda, and R.N. Clayton:
Silicon Isotopes: Evidence for Vapor Fractionation
from Allende Inclusions 357
Hiroshi Mori and Hiroshi Takeda: An Electron
Petrographic Study of Ureilite Pyroxenes 358
N. Müller, J. Oehm, and E.K. Jessberger: ^{40}Ar-^{39}Ar Dating
and the Thermal History of the Jilin Meteorite 359
Hiroko Nagahara: Matrices of Type 3 Ordinary Chondrites
and Chemical Group of Chondrites 359
C. Narayan and J.I. Goldstein: A Major Revision
of Iron Meteorite Cooling Rates — An Experimental
Study of the Growth of the Widmanstatten Pattern 360
C.E. Nehru, M. Prinz, M.K. Weisberg, and J.S. Delaney:
The Kakangari Chondrite and Its Relationship
to Carbonaceous Chondrite 361
G. Neukum: Variations in Crater Size Distributions:
Implications for the Meteoroid Complex 362
Horton E. Newsom: Iron Metal Cores in the Moon and Vesta 362
K. Nishiizumi, M. Honda, J.R. Arnold, D. Elmore, and H.E. Grove:
Measurements of ^{129}I in Meteorites and a Lunar Rock
Using Tandem Accelerator Mass Spectrometry 363
Gordon L. Nord, Jr. and Roger H. Hewins:
Thermal and Mechanical History of Tatahouine Diogenite 364
E.B. Norman and D.N. Schramm: ^{182}Hf: A New Short-Lived
r-Process Chronometer 365
